# Finding ease in Discernment

" Nothing except breathing is obligatory. You are encouraged to spend your time wisely and only agree to something if it is the most fulfilling and aligned option. It is your job to make your "yes" sacred."

Freyja, Norse Goddess of Discernment

# FINDING EASE IN DISCERNMENT

There is an inner compass we all have called our intuition that is constantly weighing the heaviness of our hearts, our egos, and the relentlessness of our minds against every decision we gravitate towards making in our lives.

Discernment is defined as the "ability to judge well" and/or "perception in the absence of judgement with a view to obtaining spiritual guidance and understanding.

Any time we give our energy to situations, people and things without calibrating our desire to make a move with the wisdom of our intuition we set ourselves up for potentially harmful and dissatisfying life and professional experiences.

# MAKING YOUR "YES" SACRED

- If your mind, body, and spirit are at odds, the answer is "no"
- Acknowledge and accept that no one is perfect and therefore your decisions will inherently be flawed from time to time
- Be clear about what it is you seek in every situation
- Saying "yes" to anything should result in you being expanded, inspired, or renewed

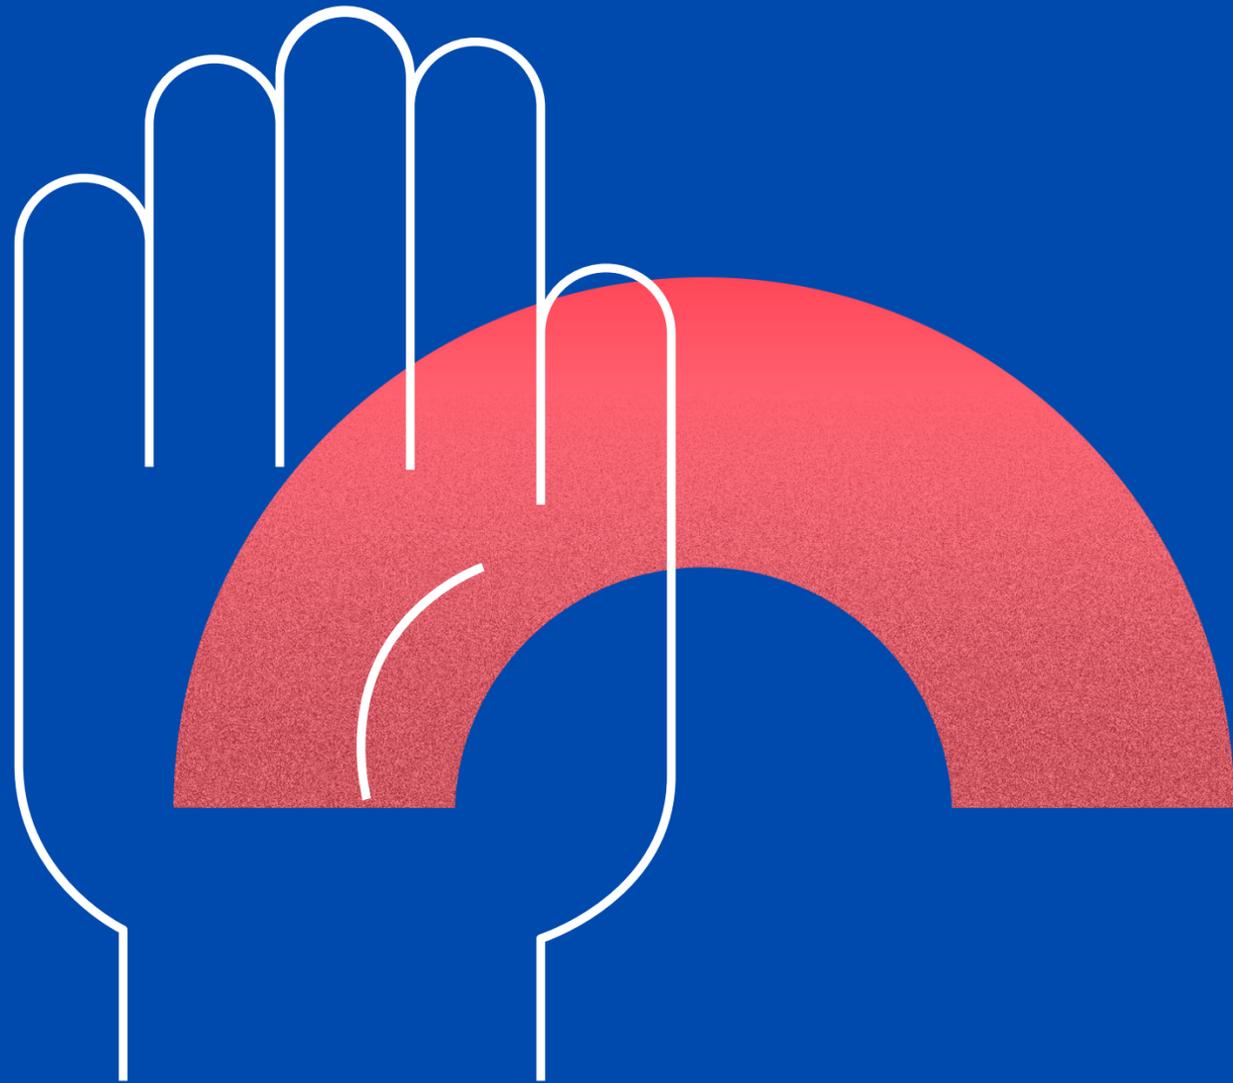

# EASING INTO DISCERNMENT

- Tame your ego and train it to be a better steward of knowing what is best for you and absolutely necessary
- Acknowledge that you may not know enough to judge any of the circumstances or people you are presented with
- Everything doesn't require your participation or input. Knowing this frees you up to consider where your energy is best served
- Feelings are not facts and the brain can be a dangerous place. Breathe and check in before making life-changing decisions or baseless judgements about anything
- When discernment is well-practiced, it can lead to the achievement of greater respect for ourselves and also others

# CHANT N' CHAT

Let's chat as a group about how well we are utilizing discernment in our personal and professional lives. What are the challenges?
